## DR. A. R. SPALDING ADDRESSES CENTER ON COURSE CHANGES

Lafayette, Ind. — Dr. Albert R. Spalding, head of the Department of Freshman Engineering at Purdue University will speak here on Wed., Dec. 14, from 12:10 p.m. to 12:50 p.m. in Room 111. The topic of his speech will be, "Curriculum Changes Beginning Next Fall." He will discuss the new freshman engineering curriculum which will become effective at Purdue in September 1956.

A. R. SPALDING

The new curriculum will enable a student to meet the higher level of attainment or preparation required by the Schools of Engineering for the sophomore year. Recognizing that students enter Purdue in varying degrees of high school preparation, ability to learn, and capacity to study, the curriculum has been made more flexible. This greater flexibility is made necessary by the higher technical standards now required of engineering graduates, Dr. Spalding states.

After receiving his bachelor of science in industrial engineering at Lehigh University, Bethlehem, Pa., in 1937, Dr. Spalding accepted a position with the U. S. Gypsum Company in its Jersey City, N. J. plant and became assistant superintendent of its paper mill department in 1939. He resigned the following year to accept the position on the Purdue staff as instructor in thermodynamics and laboratory courses in the School of Mechanical Engineering. Continuing his graduate work here, he obtained the master of science degree in mechanical engineering in 1942, and the doctor of philosophy degree in 1948.

During World War II, Dr. Spalding worked in ordnance research at Purdue and the Aberdeen Proving Grounds in Maryland. Following the war, he was placed in charge of three courses in heat power engineering and during this period, he became quite active in student counseling work. In September, 1945, he was transferred to the Physical Plant Department to aid with the design of a new steam distribution system and remained with this department until January, 1946, when the project was terminated. He then returned to the mechanical

(Continued on Page Three)

## Alexander Briefs Lions on Japan

Mr. Ernest Alexander, registrar, gave a much appreciated talk on cultural aspects of Japanese life. His talk was directed to the Hammond Lions Club diners on December 6.

Mr. Alexander has had experiences in Japanese culture, as he was a teacher in a Tokyo high school and at Tokyo University. He taught English as a foreign language to Japanese students last year.

## Pointed for Purdue

Dec. 21 Christmas Vacation Starts  
Dec. 21 Christmas Assembly  
Dec. 22 Christmas Dance  
Jan. 5 Classes Reconvene  
Jan. 21 8:30 A.M. to 6:00 P.M.  
Orientation for Beginning Freshmen  
Jan. 28 End of Semester  
Jan. 30 Registration for Beginning Freshmen  
Jan. 31 and Feb. 1 Registration for Others

## Anderson Memorial Loan Fund Continues to Grow

The Mark P. Anderson Memorial Loan Fund is gradually moving toward the \$500 mark. At the present time, the fund is \$448. If you want to contribute to this worthy cause, you can still join the many persons who have.

It is hoped that money from this loan fund will be available for next semester.

Students are requested to note editorial: "What's necessary to make College Pay."

We now have loans funds available for students which can be used to partially defray their tuition if they find some difficulty in getting set up for the spring semester. There will be a small interest charge and the loan can be made for 50 per cent of the fees.

Students interested should see Mr. Gyte for applications well in advance of registration.

The group has a tradition of being formed here at the Center, under the tentative name of Theta Delta Omega which lends itself quite well to a little cowboy sign. Good luck to those forming it, and let's hope more will be done along these lines.

## Famous Record Is Accepted For File of Famous Voices

H. A. Williamson, as a representative of M. E. Gyte (Director of P.U.C.C.) attended a luncheon at 12:15 p.m. on Thursday, December 8, in the Miller Room of the Harvey Memorial Y.M.C.A. for the purpose of hearing a recorded tribute to Sir Winston Churchill. Accepted as "one of the outstanding figures of modern history," Churchill's tribute was occasioned by the celebration of his 80th birthday last year.

Entitled "His Finest Hour," this tribute was aired over the networks like the National Broadcasting Company in the United States, Canada, Alaska, Hawaii, New Zealand, and Australia. As a result of collecting many voices of unusual historical appeal—like Hitler, Roosevelt, and Churchill, and many others—it was felt that a recording of the broadcast would hold a very special interest to college students. It covered the period of history from 1928 to 1954.

Since there are only 950 copies of this recorded edition, it is definitely considered a collector's item. Although Sir Winston has the honor of having copy number one of the first edition, P.U.C.C. is very fortunate in having Professor Williamson return from this luncheon with a copy just for the Center. It is a 33 RPM record and plays for one hour.

It certainly gives us a warm feeling inside to see the interest the faculty is finally beginning to show in student affairs. The recent organization meeting of the Student Council was graced by the presence of not only the ever present and reliable Dr. Cone, who, along with Mrs. Cone, has been carrying the full load of the Senate for years, but also Dr. Wilson and Mr. Combs.

## Dan Santerior First Candidate Of In-Plant Program

Danny Santerior, a student at Purdue Calumet Center, is making a name for himself in the D-K Manufacturing Co., located at 51st and Kezdie Ave. in Chicago.

The D-K Manufacturing Co. has been in existence for 15 years and at the present time has 240 employees. Products manufactured are cookware, wing de-icers, low pressure oxygen bottles, and liquid oxygen containers.

Danny is the first one selected as a participant in a new in-plant training program. The main goal of this program has not been specifically defined but the plan is oriented toward preparation of men for future key positions within the company.

Santerior has been employed at this company for one month and at the present time is writing rather extensive periodic reports. He finds his training in technical report writing at Calumet Center is serving him well.

## Math Department Dinner Held For Personnel

A gathering of both part-time and full-time college credit and technical institute mathematics personnel and their families was held in the Student Lounge on November 19. This was a family affair and a pot-luck dinner was provided to those present.

Mr. Charles Rhodes provided film entertainment for the youngsters. This social affair was designed to give the teaching personnel a better chance to know one another since there has been a significant increase in the mathematics staff here at the Center.

## Annual Christmas Assembly Will Feature Yuletide Dancing Groups

The annual Christmas Assembly sponsored by the Student Council will be held in the Student Lounge Wednesday, December 21, at 10:00 a.m. to 11:00 a.m. Third period classes will be cancelled on that day.

The program of the assembly will consist of various native dances by children from the Sherpetosky Dancing School, a Christmas message by a visiting minister or priest, and group singing of Christmas songs. The native dances by the children from the Sherpetosky Dancing School will represent dances usually done in celebration of Christmas in such countries as Spain, Mexico, Portugal, Hawaii, Hungary, and Serbia. A quartette of male voices will sing one or two selections as part of the program.

The chairman of the program will be Ed. Wright. Charles Macenski and Russell Phares will lead the group singing. The committee for the program for the Student Council are the following: Robert Ruboba, Edward Wright, Charles Macenski, Russell Phares, and Ronald Hrebenyak.

### CHRISTMAS DANCE

"Winter Wonderland," the annual Christmas semi-formal will be presented December 22, at 8 p.m., by the Student Council of Purdue University Calumet Center, in Hammond.

The dance will be held from 8 p.m. until midnight, in the student lounge of the center, located at 2233 - 171st Street, Hammond. Music for the big affair will be provided by Mr. Fred Roberts and his excellent dance orchestra.

Tickets are \$3.00 per couple, obtainable from any member of the Council, or at the door until 10 p.m. the night of the dance. This also includes the price of refreshments, which will be served during the course of the evening in Room 12.

Mr. Pfeil of Pfeil Studios in Hammond will take candid photographs of couples upon request at the dance.

Heads of some of the hard-working committees, who are putting this affair together are:

Orechestra, Dale Griesel; refreshments, Bill Grace; Clean-up, Charlene Chasteler; decorations, Leon LaFontaine; publicity, Glenn Mathis and John Millard; poster advertising, Judy Shields and Bob Ruboba.

Dorothy Johnstone presides at the punchbowl—Student Faculty party.

## Schlosser Takes Chemistry Group To Budd Plant

Professor F. F. Schlosser recently invited Purdue Chemistry students to join him on a tour through the Budd Plant in Gary. The trip was primarily an American Society of Metal's project. However, since Professor Schlosser is the Chairman of the Educational Committee of the Calumet Chapter of the ASM, it was possible for the students to participate.

At the Budd Company plant, the 14 students, along with the members of ASM, were introduced to the plant's operations. The visitors were acquainted with the Budd industry by an introductory film and then by Mr. J. Paul, Director of Public Relations, who outlined the processing order of the plant as well as its function in the national industry.

The visitors were conducted in groups through the plant, from one operation to another, step by step. This procedure enabled everyone to observe the effectiveness of the assembly line and conveyor belt techniques used in industry today.

The actual method of making automobile body parts, Budd's main product, was a surprise to some visitors, for many did not expect to see a plain sheet of metal pressed, cut, and pressed again until it became a definite automobile part. The finished underbodies and doors were seen to be the welded sum of many smaller parts which, too, were pressed out of sheet metal.

The mere fact that the students were invited along with the members of the ASM, who for the most part are chemists, engineers, and representatives of various industries, was in itself a satisfying experience for the students. From the tour they also acquired a better understanding of modern industrial techniques—for which they are grateful to Prof. F. F. Schlosser.

## Pre-Registration For Spring Semester

Pre-registration for the spring semester began December 7. The purpose of doing this is to keep away from a rush on the office and counseling staff and to allow time for any needed changes in schedules.

For those who are interested a Third Course in Scientific German is being offered next semester. A course in Vector Analysis is also being offered. Those who know of people planning to come to Purdue next fall should tell them that Solid Geometry is being offered for the last time this semester. Personnel Psychology is being offered for second time so those who are interested in this and other courses mentioned had better put in their bid now so that they are sure of getting what they want. This goes for any course that is offered at this extension. Put in your bid early and be sure.

## It Pays to go to College

(Reprint from the Gary-Post Tribune)

The college graduate enjoys the unquestionable advantage of making more money than his unacademic fellows, but at the same time there is thrust upon him the less obvious distinction of having fewer children.

There are about 6,000,000 college graduates in the country today, and three out of five are men.

About seven of every 10 graduates come from the 21 states in the east or midwest. And half come from cities or small towns. If a person was born in the south or lives on a farm, the chances are he will never get to college.

Graduates beget graduates. A total of 44 percent come from families in which one or both parents got a degree.

Surprisingly, 71 percent of the 6,000,000 total worked their way through college, either wholly or partly.

The college men surveyed had median earnings of \$4,689 in 1947. In the same year, the median income of all American men was \$2,200.

That a college degree pays off is shown by the fact that the college man makes more in his first year than the average man makes at his peak—his late thirties and early forties. The two medians are \$3,537 and \$2,845.

What's more, the thing snowballs. The older the grads get the wealthier they get. Grads over fifty get about three times as much as the average man.

A college degree seems to have a domestically settling influence on a man. Of the college grads, 96 percent were still living with their wives at the time of the survey. For the U. S. as a whole, the figure was 89 percent.

Of the Old Grads, 31 per cent are unmarried. This compares unfavorably, or perhaps it's favorably, with the 13 percent unmarried among the American women as a whole. In this connection, Dr. Paul Popenoe, the sociologist, believes there is a "widespread tendency of women to seek to marry above their own level, and of men to seek to marry below."

Ernest Havemann and Patricia Salter West have written a book based on the survey and titled, "They Went to College." The authors say the figures knock down the myth that the colleges are hotbeds of radicalism. The average college man, say the authors, is quite conservative in his political opinions.

As partial proof they cite survey figures showing 64 percent were generally opposed to the "New Deal" and its political program, as against 36 percent who generally favored it.

All of which leaves us uncomfortably at a loss for a tidy conclusion to draw from the whole business. Probably the most to be hoped for, meantime, is that happy day when every man is a college man, capable of making his own survey.

## What's Necessary to Make College Pay?

After reading the above reprint, it would seem that all that is necessary for anyone to earn a good salary is to go to college. It is not mentioned that a lot of different items went into the securing of that college education. A few of the important items are time, physical fitness, mental ability, and last, but not least, money.

Supposing that of all the above items, the only one that prospective college student lacks is money. What then? Either he receives the necessary money and goes to college or his failure to receive some will mean no school for him. Industry, unions, and other organizations along with private individuals have recognized this deterrent to a greater college population and have donated money or have established funds for such needy students. Here at Purdue there are available such loan funds for those students interested in financial aid. These funds are established with the idea of providing money for qualified students to borrow in order that they can be aided in tuition, and the principles are to be repaid to the fund with interest.

One such loan fund that was established as a Purdue project is the Mark P. Anderson Memorial Fund. It is open to all those interested in the biological fields or allied sciences. For this particular fund anonymous persons have donated sums up to \$100 and as low as fifty cents. Since this is the season of giving, when we are celebrating the birthday of the man who was the greatest educator the world has ever known, why don't you make your donation to one of the many worthy loan funds today? Call it your Christmas present to Purdue Center and its many promising students.

## Lost and Found

A lost and found department has been set up at P. U. C. C. through the cooperation of Mrs. Paul Meier, the librarian.

All lost articles should be turned in to her at the library. Articles of

small value will be placed in a box and be available at all times. Articles of greater value such as slide rules, etc., will be locked up until positively identified. If you have lost something, contact Dale Griesel or Vince Ortega to identify the article.

## Around the LOUNGE

By Waldo-Ray

Well, before the little men in the white coats come for this little character to take him on his well-earned vacation, I had better spill the beans as to the beans around the Center. Perhaps the most recent was the huge (?) attendance at the pep rally last week, this was really pitiful. For the next one let's see a couple more hundred people there. And I heard that the T.I. has recently had a really fine dance. right RAY? What about it RED? . . . The fellows from the room with the brass spittoon say, "unionize". . . proposed are three major arguments; a guaranteed annual grade, no yellow slips, and an increase in pay for the teachers. some of the minor issues are: more time for playing cards in the lounge, and cards furnished by the Senate so our cards could be left at home. . . . Just found out that the girls have a nickname for their anteroom. This name is gopher hole. Very appropriate, indeed. Some of our guys are really giving the girls a bad time by hiding shoes when a girl takes them off. I hope this will cure the girls of this habit. After all, how would they like it if we took off our shoes? Another question, Could we stand it ourselves?

A preview for next (?) month. You will finally be able to read the truth about the whip aerial on Honest John's Nash. This is one reporter who is not afraid of the syndicate so this promises to be a most interesting story. Also on the agenda is a complete analysis of the everpresent parking problem and what we propose to do about it. And back to the GOPHER HOLE for more interesting news and some of the complaints from them about the boys here at the Calumet Campus.

## Purdue Personalities...

**Audrey De Vries & Vera Schramm**  
No organization, even a school, could function without the help of an office staff, and so here are two members of Purdue's Calumet Center Office Staff.

First, meet Audrey DeVries. She is originally from the Calumet area, and is now living in Lansing with her husband, Harold, who is a salesman for the Sealtest Ice Cream Company.

Audrey has been with Purdue as Mr. Gyte's secretary for the past nine years.

Among Audrey's interests are baking and cooking, in which she enjoys trying all kinds of new recipes.

She also enjoys reading everything except westerns and mysteries.

Both Audrey and her husband hope to build a home some day, but in the meantime their interest in traveling is at a high pitch.

Although she left us last September, you should have a chance to meet Vera Scramm, who recently became the mother of a fine baby girl on November 27.

Vera and her husband have a home in Highland. Her husband works for the United States Reduction Company.

Vera's schooling included some work in the chemical and metallurgical fields in the Technical Institute here at the Center.

The two main interests of Vera that will continue to consume all of her leisure time for some time to come are her daughter and her husband.

The sports staff of the Boilermaker says a regrettable goodbye to Stu Holcomb, and wishes him good luck at Northwestern; we congratulate our new coach, Mr. Jack Mollenkoff, and wish him good luck.

Reports have it that Dr. Nagler and Mr. Aurelias will help with activities as the ball really gets rolling. Although the work is only supervisory and advisory, sponsorship of the Student Council is still a full-time job.

## That's What I Want for Christmas

## Loose Rivets In the Boiler

By John Millard

It now occurs to this writer that if The Lord could give the world His only son, in such a supreme act of generosity, the students of this institution could put forth the effort to be generous enough to give the people who operate the lounge a break. That lounge is a disgrace, an outrageous, and worst of all, an unnecessary, disgrace! The condition that the lounge is left in would even be a disgrace to a pig farm.

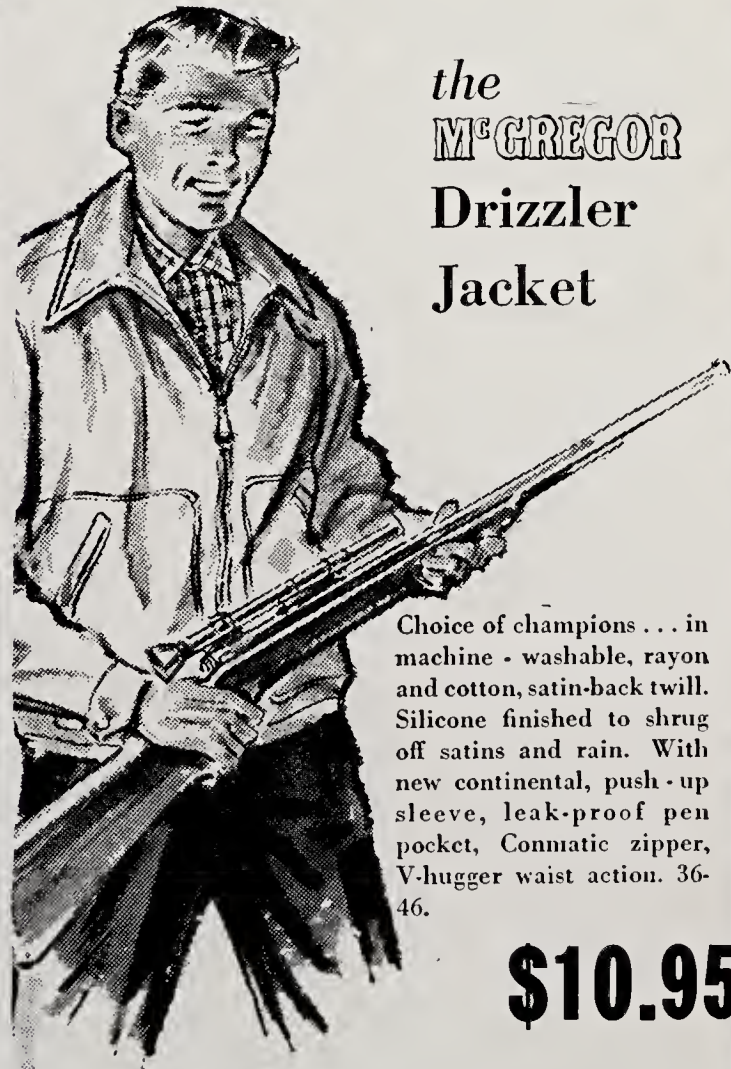

It is a colossal mess, and the worst part of it is that if you, the students, would just have the common sense and human decency to take your empty bottles and garbage to where they belong, it would be better. We cannot believe that any persons who are too darn stupid to take their garbage to the proper place, or to know where those places are, are at Purdue. Since stupidity is ruled out in an institution of this nature, the prob-

lem is narrowed down to the rank slovenly laziness of those people who just don't give a royal darn if they would live in a pigstye. We wish the pigs, and pigheaded people, would just stay the heck out of the lounge, and go out on the surveying field and take their refreshment, animals belong out of doors, not in our lounge!

In this Christmas season, let's all get together, and help keep this mess down. We know that it can never be eliminated because we will always have the pigs among us, but we can all try. Our goal could easily be accomplished by each person simply being responsible for his or her dishes, garbage and bottles. Let's make this a Merry Christmas for the people in the lounge; and don't forget about Happy New Year.

Your servant, the tightener of loose rivets, wishes to take this opportunity to wish you a very Merry Christmas, one and all; and to put down a paragraph or two on the spirit of Christmas, extended to our every day life. (See Page 3)

# Center Squad Bruised At Joliet 95-51

By Homer Wolf

The Calumet basketball squad initiated the 1955-56 basketball season against Joliet Junior College November 22. The Joliet team proved to be rude hosts as they hit the Boilermakers with everything except the referee.

Using a very fast zone defense, the alert Steelmen forced Purdue to shoot over the shifting defenders. With our offense bogged down because of poor marksmanship from the outside, Joliet steadily pulled away. Our shooting average from the floor was an anemic .233, this factor becoming doubly disastrous as Joliet dominated both the offensive and defensive boards.

While we were dropping in six buckets during the first half, the Steelmen burned twenty goals through the nets as they compiled an amazing .657 shooting percentage.

The rest period between halves didn't seem to cool off the Joliet team as they came back and added 50 points to their first half total of 45. From the sidelines, the Joliet team looked as if they were equipped with radar as they wound up with a .738 average from the floor.

While Joliet was having an interesting practice session, the Purdue boys were giving their best and still couldn't make any headway. The Boilermakers were just outclassed. Having had only two practices per week, such training hurts not only the shooting skill of the players, but they cannot keep in proper condition.

The high scorer of the game was Flatt of Joliet with 24 points, followed closely by his team-mate, Penosky, with 23. Teamed together, Flatt and Penosky led Joliet to a lopsided 95-51 victory.

For Purdue, Chuck Jonas and Charles Lannin took high honors by pumping in ten points apiece.

The box score for Purdue is as follows:

Name	f.g.	f.t.	p.f.	p.
Leith	1	6	1	8
Payne	2	0	1	4
Givan	2	2	2	6
Jonas	1	8	1	10
Kaiser	2	2	1	6
Kornet	1	1	2	3
Perkey	0	0	1	0
Lannin	2	6	2	10
Tsalickis	2	0	3	4
Dedelow	0	0	0	0
Team	1st Half	2nd half	Final	
Joliet	45	50	95	
Purdue	19	32	51	

# Loose Rivets In the Boiler

Christmas, to us, has always meant giving, rather than receiving. When Christ came into this world, back on that first Christmas day, it was a supreme act of giving. Our Lord gave us His only begotten son, that the world might receive Him, and hearing Him, lift their eyes toward salvation. This was the ultimate of generosity.

The Student Council is sponsoring its annual Christmas formal Thursday night of next week, from 8-12. Music by Fred Roberts, and his orchestra, and Mr. Pfiel will be over to take some candid shots of the affair. The winning theme for the dance was Winter Wonderland.

Also on your schedule for next week should be the Wed. night basketball game at Morton Jr. College of Cicero. The game is being played at Morton High, in Cicero, which is an easy place to locate. Just go north on Cicero Ave., to the big Western Electric Plant where a road goes over Cicero, turn left, and get on the overhead road going West. Take it as far as Austin, and turn right. The school is about a half mile north on Austin. Let's get out and back our team (don't forget, fellows, the cheerleaders will be there).

Our first home game is going to be Jan. 10, and there will be a BIG rally beforehand, and plans are being made for a sock-hop afterwards. When we say BIG, we remind you that the one we had recently, while being the first, was just a small affair. We do want to thank Chuck Macenski, our cap-

# Normal Problems, Normal People Hit Purdue Guidance Center

Many students at both the College and Tech. Inst. levels have already taken advantage of the guidance center services this term, according to Prof. Kir-Stimon, guidance director. These are in addition to other individuals from the Calumet area who have come to Purdue for counseling.

The problems that come to our attention, remarked Dr. Kir-Stimon are for the most part normal problems of normal people who have some difficulty in educational and vocational planning. In no way do we tell the individuals what to do. We are primarily concerned with assisting them in finding their own insight and sense of direction.

Testing and counseling services are free to full-time students. Appointments may be made by calling Dr. Kir-Stimon or visiting the guidance center office in room 30.

tain of cheerleaders, for his efforts in arranging the rally program, and Mr. Rhodes, for allowing us to adapt the public address system to our specialized need and loaning us his lab to do it in, and Mr. Hale, for his efforts, which helped to make the affair possible.

Just to keep the record straight, the booing and other unsportsmanlike sounds which were quite obvious to the listeners to the Joliet radio station during our recent game, did not come from the Purdue section. It was unfortunate that this occurred at all, but just to keep the record straight, P.U.C.C. students do not do such things. We never have been responsible for such things and never will be.

Speaking of cheerleaders and pep rallies, have you noticed the changes going on around here lately? We are on the map, and we are getting to be a bigger dot all the time. We cannot help but feel that we now are well on the way towards becoming a full fledged college with a full fledge college spirit, and once we become that, it is just a matter of time before we replace Northwestern in the big ten.

Anybody who misses the Kendall game at home this year is crazy. We are planning soc-hops after as many of the games as possible, and judging from the nice, friendly group of girls we ran into up there,

Instructor D. E. Norris and his Inland Steel class discussing a student technical report.

it should be a great event. For that matter, anybody who misses any of our home schedules should have his head examined. These games are going to be a riot. For those of you who just read this column and the other funnies in here, here is a brief rundown of the home schedule (for the more ambitious ones, there is a full schedule printed elsewhere in the paper; one might try the sports page):

Tues., Jan. 10—Elgin (pep rally before, soc-hop after).

Tues. Jan. 17—Joliet (revenge will be taken!) (there may be a soc-hop, depending on how the one before works out).

Tues., Jan. 31—LaGrange (possible soc-hop).

Tues. Feb. 7—Thornton (possible soc-hop).

Tues. Feb. 14—Wright (possible soc-hop).

Tues., Feb. 21—Kendall (soc-hop if we have to hold it in jail!)

There is one more event to place on the agenda. That is the tournament, on Feb. 4, 1956, down at the Fieldhouse. There will be a gigantic rally on Feb. 3, and if we take first place, there will be one big bang of a celebration afterwards. More will be said about this next month, if the old fingers don't give out, and the ancient typewriter holds together till then.

Chuck Macenski helping Kendall girls lead cheers.

## Wright Junior Fights Back, Wins 80-52

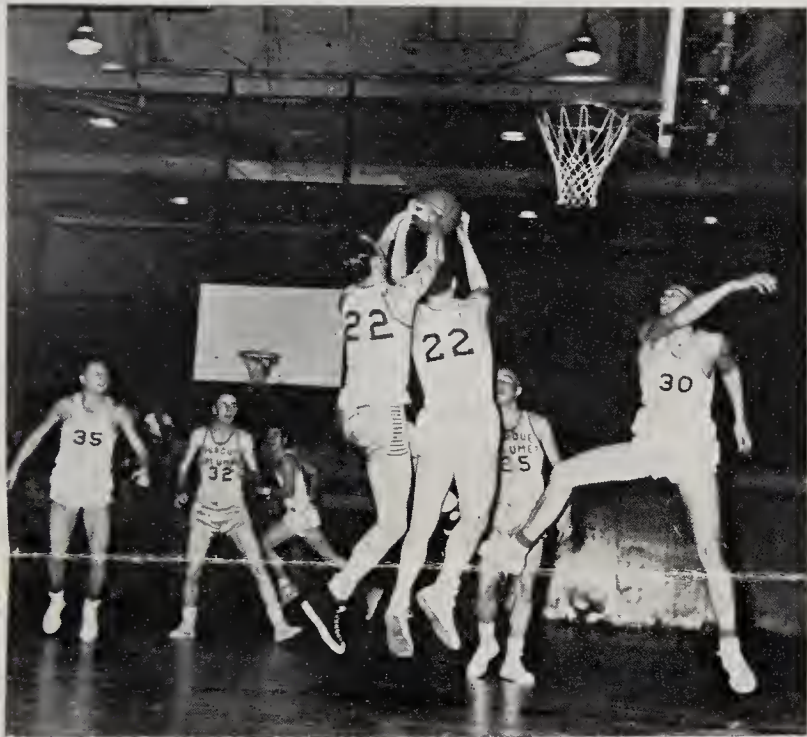

Wright Junior College dumped P. U. C. C. 80-52 on Wednesday, December 7, to make the record read one win against two losses.

Purdue scored first to make the score two to nothing, and then it was a defensive battle as both teams were unable to score for over four minutes. Wright finally tied the score at 2-2 and then went ahead to 12-3. The closest we came to them after that was 10-14. The Purdue team seemed to lack the spark that they needed. They didn't fall back on the defense as they should and so lost several points on fast breaks. Hosea Givan played a very good rebounding game as time and time again he came down with the rebound.

The Wright team was led by their center, Olsen, a very fine player who played a tremendous game. Olsen gathered up twenty-five points as he hit jump shots and several beautiful hooks. He played a fine defensive game in keeping the lane blocked.

Holton Easter was again high scorer for Purdue with 15 points. Easter was the only player to get into double figures as the remainder of the points were distributed fairly evenly among the other squad members.

The games to be played before the next edition of the Boilermaker are with Morton of Cicero, on December 21, and with Elgin, on Jan-

Action shots at our recent basketball games.

uary 10. The Elgin game will be our first home game.

The box score for Purdue is as follows:

Name	f.g.	f.t.	p.f.	t.p.

## We Dood It!!! Center Boilermakers Win First of Season

Victory! P.U.C.C. gained its first basketball win of the season Monday, December 5, as Purdue downed Kendall College 87-32. The Boilermakers seemed to find their stride a little better as they shot .410 from the floor and .530 from the free throw line.

Kendall hit on only three of 29 shots in the first half for a .103 average, far below normal. The story of the game was Purdue's offense as they tried 95 shots from out. The Purdue defense was very alert and intercepted many Kendall passes. Four starters scored in double figures with Holton Easter hitting for 19, Charles Lannin for 18, and Hosea Givan and Chuck Jonas for 16.

Givan	7	2	2	16
Kaiser	2	0	1	4
Jonas	7	2	1	16
Kornet	1	0	3	2
Payne	1	0	1	2
Tsalickis	1	0	2	2
Dedelow	3	0	0	6
Leith	1	0	1	2
Team				Final
Purdue				87
Kendall				32

Coach Bob Hayes plans strategy.

The reserves played most of the last quarter, coming in with the score 73 to 26. Coach Hayes substituted freely throughout the game to give each player some experience.

High scorer for Kendall was their center, Frey, with eleven markers. Ireland and Haney followed Frey with nine and eight points, respectfully.

Congratulations are in order for the team and Coach Hayes on their first victory of the season.

The box score for Purdue is as follows:

Name	f.g.	f.t.	p.f.	t.p.
Easter	9	1	3	19
Lannin	7	4	0	18
